

RELAY G55

Digital Guitar Wireless System

Based on patented, fourth-generation technology, Relay® is leading the digital wireless revolution for guitarists. The Relay G55 system delivers tour-grade digital wireless in a compact, half-rack format—so you can experience wireless freedom without compromising your tone. Featuring 12 channels of compander-free 24-bit audio, full 10Hz–20kHz frequency response and 117dB dynamic range, the G55 signal is so pure and strong it sounds just like a wired guitar. 2.4GHz operation and proprietary DCL™ signal protection provide rock-solid performance—while one-step setup and worldwide, license-free operation make Relay G55 incredibly easy to use.
