KSM9 Multi-Pattern Dual Diaphragm Handheld Condenser Vocal Microphone

Overview

The first-ever handheld condenser with dual diaphragms and switchable polar patterns. A premium vocal microphone, the KSM9 captures vocal subtlety with extraordinary detail to deliver clear articulation, functional flexibility and precise vocal reproduction for live performance. Transformerless Class A preamplifier circuitry provides transparent sound capture, dual gold-layered diaphragms reveal every nuance and subtlety in a vocal performance, and an advanced suspension shock mount virtually eliminates handling noise even in the most demanding live environments.

Features

- Dual 3/4" gold layered, low mass Mylar® diaphragms provide superior frequency response.
- Dual polar patterns (cardioid and supercardioid) for maximum flexibility in a wide variety of performance applications.
- Class A, discrete, transformerless preamplifier provides transparent, extremely fast transient response with no crossover distortion and minimal harmonic and intermodulation distortion.
- Advanced suspension shock mount system that isolates cartridge from handling and stand noise.
- Premium electronic components, including gold-plated internal and external connectors.
- Three-stage grille reduces "pop" and breath noise.
